Effects of a Transtheoretical Model Intervention Program

The purpose of this study was to determine the effects of a transtheoretical stage model intervention program on physical activity level, enjoyment of physical activity, perceived physical competence, and self-efficacy for high school females. The second purpose of this study was to compare the effects of peer facilitation, teacher facilitation, and combined peer and teacher facilitation on the four dependent variables for high school females. The third purpose was to examine the relationships between physical activity and enjoyment of physical activity, perceived physical competence, and self-efficacy.

三、寫作題，25%

As an applicant of graduate program in Sport & Leisure Department, would you write down a short paragraph (about 400-500 words) to interpret the phenomenon of “Lin-sainity”.
